This best describes my wishes:

☐ I would like to maintain **the way my breasts look now** when naked, with a natural, inwardly sloping upper breast. I do not like the look of a full, implanted breast with a bulging top.

☐ I would like a **full upper part of the breast**, but without it bulging outward like a push-up bra, or overly stretching my tissues, so I am more likely to minimize future sagging, stress on my tissues, future reoperations and complications.

☐ I want **as much fullness as I can get in my upper breast**, keeping in mind what is appropriate for my breast dimensions, my frame, and what's best long-term for my tissues, knowing that a "push-up bra look" is only achievable with an actual push-up bra.
